MOSQUITO NET

Important: Read the user manual carefully
and keep it for future use.

moonboon
designed for better sleep

USER MANUAL

The Moonboon mosquito net comes in two sizes: one for the baby hammock and one for the cradle and twin baby hammock. It can be used with or without a cradle bouncer.

WHAT IS INCLUDED?

- 1x Mosquito net, 100% polyester, with drawstring and snap button fastening.
- 1x Product bag in the same fabric.

FUNCTIONALITIES

- The main purpose of the mosquito net is to keep mosquitoes, flies, and other insects away from your child while sleeping in the cradle, baby hammock, or twin baby hammock in the warmer months.
- It features an overlapping opening that makes it easy to open and close, allowing you to place your baby in their cradle, baby hammock or twin baby hammock without removing the net every time.

ASSEMBLY

- 1 Locate the top of the mosquito net where the drawstrings are. If the drawstrings are tied, untie them. Widen the opening at the top as much as possible. When widening the opening, make sure the drawstrings are not pulled into the drawstring tube.
- 2 Pull the mosquito net up around the cradle, baby hammock or twin baby hammock through the top opening.
- 3 Adjust the net to ensure the overlapping opening is aligned to the front of the cradle, baby hammock or twin baby hammock, where the Moonboon logo is shown.
- 4 If installing the mosquito net on a baby hammock or cradle, use the snap button to attach the mosquito net to the metal ring. The button fastening goes inside the metal ring.
- 5 If installing the mosquito net on the twin baby hammock, the snap button fastening is attached through both of the two triangle carabiners.
- 6 Once the button fastening is secured, tighten the drawstrings and tie them together in a loose double knot. For safety reasons, ensure that the length of this and any remaining drawstrings stay short, so that your baby cannot reach them.
- 7 Your baby is now ready to enjoy a peaceful nap, undisturbed by insects.

Please note

If you are using a cradle bouncer, leave space around the motorwire string when tightening the drawstrings to avoid any interference.

Please note

Do not tie the double knot too tightly. This will allow you to easily untie the knot to remove the net again easily.
