

User manual

# Mosquito Net for Baby Hammock

Important: Read the user manual carefully  
and keep it for future use.

# User Manual

---

The Moonboon mosquito net has been designed to be used with the baby hammock and motor.

## What is included?

---

- 1 x mosquito net made from 100% polyester, with drawstring and snap button fastening.
- 1 x product bag in the same fabric.

## Functionalities

---

- The mosquito net is an accessory to keep mosquitoes and flies away from your baby hammock during the warmer months.
- The mosquito net has an overlapping opening that makes it easy to open and close, allowing you to place your baby in the hammock without removing the net every time.

## Assembly

---

- 1 Locate the mosquito net's overlapping opening: This is 'the front' of the product.
- 2 Locate the 'top' of the mosquito net where the drawstrings are.
- 3 If the drawstrings are tied, untie them. Widen the opening at the top as much as possible. When widening the opening, make sure the drawstrings are not pulled into the drawstring tube.
- 4 Pull the mosquito net up around the baby hammock through the top opening.
- 5 Adjust the net to ensure the overlapping opening is in line with the front of the baby hammock where the Moonboon logo is shown.

*Continued on the next page...*

- 6 Use the snap button fastening to attach the mosquito net to the baby hammock's metal ring. The button fastening goes inside the metal ring.
- 7 When the button fastening is secured, tighten the drawstring around or just below the metal ring. Leave space around the wire string to avoid any interference.
- 8 Tie the drawstring in a soft double knot. The length of this and any remaining drawstrings should, for safety reasons, be no longer than to the baby hammock cross bar.
- 9 Finally, adjust the mosquito net for a final time to ensure the overlapping opening faces the same direction as the front of the baby hammock where the Moonboon logo is shown.
- 10 Your baby is now ready to enjoy an undisturbed nap.

## Safety Checklist

---

- When you tighten the drawstrings, make sure to leave space for the metal ring and the wire string to avoid the net interfering with the wire.
- Do not tie the double knot too tightly. This will allow you to easily untie the knot to remove the net.
