Important! Read the user manual carefully  
and keep it for future use.

# User Manual

---

The Mounting Kit has been designed for the Moonboon baby hammock, twin baby hammock and cradle for an optimum vertical suspension in concrete ceilings and wooden beams.

Only use the ceiling hook with the mounting strap that comes with the mounting kit. The mounting strap comes with 6 loops that allows you to adjust the length to your needs.

Follow the instructions carefully for proper and safe use.

## **WARNING!**

Your baby can fall if the product is not installed correctly.

## **WARNING!**

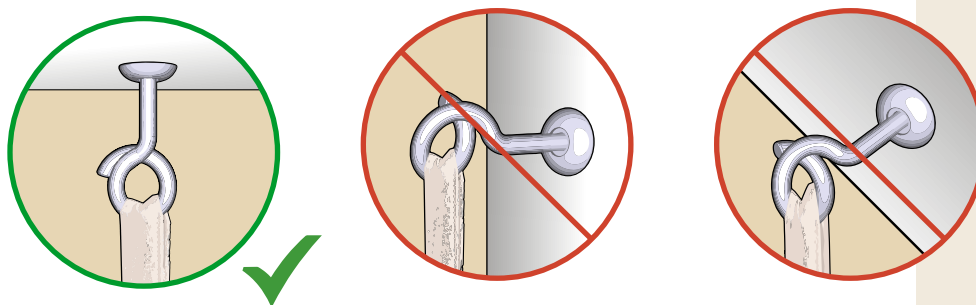

Do not use this product without reading this user manual first

## **WARNING!**

If you are in doubt about how to install the product correctly, have a professional craftsman perform the task and make sure he reads this user manual first.

## **WARNING!**

Only install the ceiling hook vertically, e.g. into a ceiling. The ceiling hook is not developed or tested towards horizontal installation, neither in beams nor walls, nor is it suitable for installation in sloped walls or sloped ceilings.

## What is included

---

- 1 x mounting strap (50 cm long / 1.6 feet long)
- 1 x stainless steel ceiling hook
- 1 x Fischer plug

## Please note

You need a minimum of two meters from floor to ceiling in order to use the mounting kit with both a Moonboon Motor and a cradle or baby hammock mounted in it; any less and you risk that your product will touch the floor when bouncing.

## Installation in wood

Installation can be performed in solid wooden beams and stable wooden ceilings with a thickness of more than 12 mm, where the hook is mounted.

Follow the following instructions carefully to ensure correct installation and mounting.

1 Use a  $\varnothing$  4 mm wooden drill bit to make a hole of minimum 52 mm in depth.

2 Screw in the Ceiling Hook until the rosette washer (the white ring) closes tightly against the ceiling.

The rosette washer secures a nice smooth finish between the hook and the ceiling.

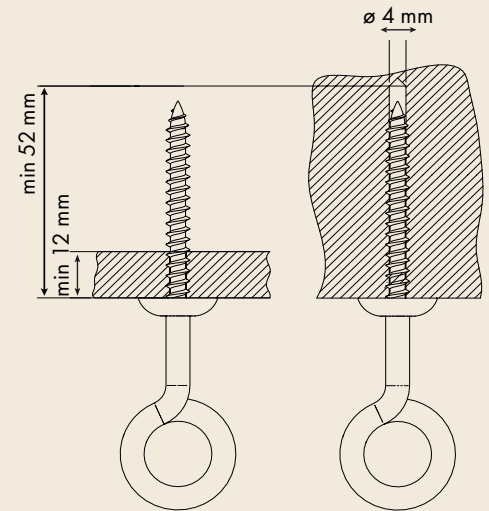

3 The Mounting strap is now ready to be attached. First choose how long you want the strap to be: There are 6 options, one for each loop on the strap.

Install the Mounting Strap securely on the hook and then attach your Moonboon product of choice by way of the accompanying Carabiner. Check that the Carabiner is locked securely.

Leave any excess loops hang down from Ceiling Hook.

4 Check the installation with 15-20 kg (33-44 lbs) load in the Baby Hammock, Twin Baby Hammock or Cradle. While performing this test, absolutely no movements of the hook are allowed.

The Mounting Kit is now ready for use. Before you put your baby in the Baby Hammock, Twin Baby Hammock or Cradle for the first time, go through the **SAFETY CHECKLIST** and make sure all instructions have been followed.

## Installation in concrete ceilings

Installation can be performed in solid concrete ceilings. Follow the following instructions carefully to ensure correct installation and mounting.

- 1 Use an  $\varnothing$  8 mm drill bit for concrete walls to drill a hole of minimum 52 mm in depth. Mount the Fischer plug.

- 2 Screw in the Ceiling Hook until the rosette washer (the white ring) closes tightly against the ceiling.

The rosette washer secures a nice smooth finish between the hook and the ceiling.

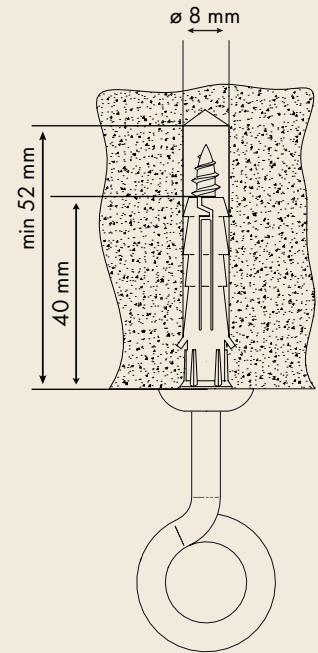

- 3 The Mounting strap is now ready to be attached. First choose how long you want the strap to be: There are 6 options, one for each loop on the strap.

Install the Mounting Strap securely on the hook and then attach your Moonboon product of choice by way of the accompanying Carabiner. Check that the Carabiner is locked securely.

Leave any excess loops hang down from Ceiling Hook.

- 4 Check the installation with 15-20 kg (33-44 lbs). load in the Baby Hammock, Twin Baby Hammock or Cradle. While performing this test, absolutely no movements of the hook are allowed.

The Mounting Kit is now ready for use. Before you put your baby in the Baby Hammock, Twin Baby Hammock or Cradle for the first time, go through the **SAFETY CHECKLIST** and make sure all instructions have been followed.

## Adjusting the length of the mounting strap

The Mounting Strap can be adjusted in length using 6 loops to shorten or lengthen the Mounting Strap to fit your needs.

Attach the Mounting Strap to the carabiner which is attached to the Moonboon product. Check that the Carabiner lever is securely closed and locked to prevent unintentional opening during use.

To adjust the Mounting Strap, find the Strap loop that fits the wanted length and mount the chosen loop on the Ceiling Hook.

If you want to change the length of the Mounting Strap, detach the Mounting Strap from the Ceiling Hook, and adjust it.

## Safety Checklist

Carefully read the safety checklist below. Once you have gone through the list and made sure everything is as described, you may start using the Mounting Kit. Enjoy!

- Before mounting a Baby Hammock, Twin Baby Hammock or Cradle on the Mounting Strap, perform a “wiggle and pull test” of the installed Ceiling Hook. While performing this test, absolutely no movements of the hook are allowed.
- Check that the Mounting Strap is securely attached to the Ceiling Hook every time you use the Mounting Kit.
- Check that the Carabiner is locked securely every time you use the Mounting Kit.
- Ensure that you don't exceed 20 kg (44 lbs) load hanging from the Mounting Kit, which is its maximum weight capacity.

### Please note

You baby must under no circumstances be placed in the Baby Hammock, Twin Baby Hammock or Cradle during adjustments.

The Motor must be turned off during any adjustments.
